

AKRILLE

CUTRERA BASTIANICH

CERASUOLO DI VITTORIA DOCG

Nero d'Avola and Frappato

Maturation

The grapes, well ripened and selected in the vineyard, are harvested between the second and third decade of September. Frappato and Nero D'Avola undergo red vinification with maceration on the skins for about 15 to 20 days in steel tanks at a controlled temperature between 22 and 27 °C. Maturation in steel for about 8 months follows, after which the wine is bottled to rest for about four months.

Tasting notes

Cherry red color with purplish highlights. Our Cerasuolo di Vittoria DOCG presents fruity notes on the nose, with hints of blueberry, morello cherry and blackberry. The taste is full, soft and enveloping, with notes of red fruits and a long finish persistence.

Pairing

Ideal with red meats, game and aged cheeses such as Ragusano DOP. A serving temperature of 18 to 20 °C is recommended.
